*Helleborus x lemperii HGC 'Winter Ballet Katie'*

**May 2024**

*Acanthus  
'White Lips'*

*Acanthus  
'Whitewater'*

### Clive's Comments

Sometimes it is just plain hard to accept how some decisions are made. We lost our automotive industry because we were paying all the staff far too high salaries. One could argue that they deserved them but very few people were willing to pay the significant extra it cost at the retail point. Last week they negotiated a 5% per year for four years pay rise for a particular union. The government were the employer and don't really care what they pay because they just raise taxes or raise the deficit. Inflation is already under 5% and is predicted to go down to 2-3% so how do they justify 5%?

This will now feed through all construction and then public service unions. I understand and accept that we all have different political viewpoints but surely the fact that if you keep paying more at base level wages then it can only add to inflation. There is a view that anyone who employees people is simply exploiting them. That everyone deserves the right to earn the same amount of pay. People do not deserve the same pay they deserve the same opportunities. No-one denies this and we must accept that the type of job you have will determine how much you earn. There will always be a ratio between what a base level young worker earns and what a trained, intelligent hard working older person earns. This is where the opportunity to improve is so important.

It seems crazy that we all want to pay less for everything and anytime prices go up someone is...

**Clive's Comments continued...**

...price gouging. However every time a cost goes up the pressure is on the producer to increase their sell price. In general wages make up 30% of input costs so a 6% pay rise will translate into a 2% price rise. As this happens at all stages in the chain the cost of goods will go up proportionally. When the system is paying \$120,000 for entry level staff in the government funded construction sector it will not be long before the base salary is this level. Prices will have to rise to cover this. If they don't small business will close. 2000+ companies shut down in the last twelve months in Victoria. I doubt that 1000 new companies have started. If this trend continues we will be in serious trouble then the hand wringing will start.

If this wasn't bad enough then the state of Victoria is doomed. We are currently paying \$10million a day in interest. This is \$3.65 billion a year. Just in interest so we get nothing for it. How many hospitals, schools, public houses could we build with this money? One could argue that it is worthwhile due to the capital development we have seen in Victoria. However almost all major projects are over budget and overdue plus they are starting new projects.

Where is this interest going? Government bonds or foreign governments who have loaned us the money. This is just insanity! As a state we must stop spending. Even if it means leaving new projects half done. We must stop until we can get our finances in balance and drop the debt levels. As a small business if I kept borrowing at this level the banks would shut me down. If I keep trading when I can't pay my debts when they fall due without relying on borrowing for recurrent expenditure then I am trading whilst insolvent. This is illegal! I suspect the State of Victoria is insolvent.

The members of parliament are technically directors of the company known as Victoria. There are other serious responsibilities of directors;

*The Corporations Act imposes general duties on directors and officers of companies, including the duty:*

*- to exercise your powers and duties with the care and diligence a reasonable person would have, including taking steps to ensure you are properly informed about the company's financial position and the company doesn't trade if it is insolvent*

*- to exercise your powers and duties in good faith in the company's best interests and for a proper purpose not to improperly use your position to gain an advantage for yourself or someone else, or to cause detriment to the company*

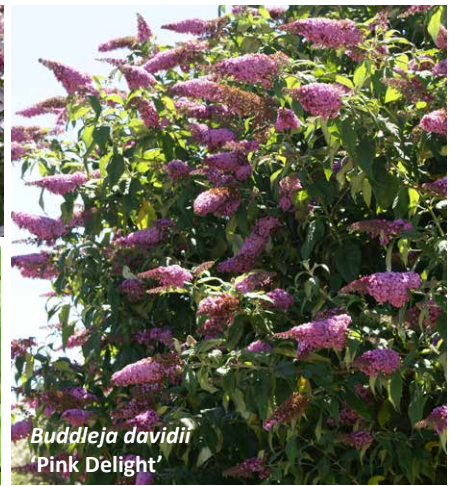

*If dishonesty or recklessness is found to be a factor in your breach of general duties, the breach can be a criminal offence and substantial criminal penalties can apply, including up to 15 years' imprisonment.*

We have to wonder about what is happening around the Victorian Board Room. We cannot keep going down this path of build at any cost and set ideological goals on a people who cannot afford it. We must stop spending, NOW! Not next budget, not when we change government but now. I cannot afford to pay anymore tax or government charges. We have dropping retail and thus dropping wholesale incomes. The main source of funds for the State is small business and they are struggling to survive.

As the saying goes: Blind Freddy could see what is happening. Why can't those in power see????

**Clive Larkman**
